

Conference Center

Don't Just Tell Them, Show Them

With just a PC and a browser, you can substantially improve the quality of your conference calls simply by visually engaging the participants on the call. The Conference Center and WebDialogs empower users to share presentations, documents, web content, applications and desktops with individuals and groups around the world in real time.

Key features include:

- Application / desktop sharing
- Remote control
- SSL encryption
- Chat
- Marker for annotation
- Hand raising
- Multiple hosts
